# TOCON starter kit *optional TOCON accessory*

Features

Properties of the TOCON starter kit

- Kit for initial testing setup – take a standard voltmeter from your toolbox and get into the world of UV radiometry.

- output voltage 0 .... 9 V

- Usable with all TOCON detectors (not included)

- 9V block battery included, typical runtime 3000 hours

- Separate 4mm banana plug ground and signal cable for easy connection

How to connect

- Put a TOCON into the 3pin transistor socket.

- Connect the 9V battery.

- Put the 4mm banana plug connectors into your voltmeter

    yellow = signal voltage out = plus terminal of the voltmeter

    black = ground = ground terminal of the voltmeter
